**COVID-19 Status Report
Oak Park Village Board of Trustees**

To: Village President and Village Board of Trustees

Fr: Lisa Shelley, Interim Village Manager

The memo is a weekly status report presented Wednesdays and provides a brief summary of information regarding Village of Oak Park operational activities in response to COVID-19.

The Oak Park Health Department is working with the Village Manager's office on ideas to change the report for the 2022 calendar year. Data elements and formatting are subject to change until new reporting structure is finalized.

New COVID-19 Cases

The Village of Oak Park Department of Public Health received official notification of 154 COVID-19 cases from February 2-8, 2022. This is a 34.5% decrease over the last 7-day period, and a 85.7% decrease over the cases 30 days ago.

COVID-19 Community Transmission Rates

Based on the positives cases reported to the Village of Oak Park, for the week of February 2-8, our weekly COVID-19 rate of 283 cases per 100,000 placed us in high community transmission range.

These numbers do not reflect those who tested positive using at home self-administered test. At-home test must be confirmed at an official testing site (pharmacy, physician office, health department, school, etc.) so that information can be transferred to the health department. Official test results are used to track the amount of virus in the community and release people who test positive from isolation. The health department cannot provide any resident with a release from isolation without an official notification of their COVID-19 positive status.

Test Positivity Rates

The test positivity rate for Oak Park as of February 8 is 3.01%, representing an 4.9% increase from the previous week. The test positivity rate for the region was 5.9% on February 6, representing a 11.9% decrease from the previous week.

Illinois considers a positivity rate below 5% as low. The test positivity rate is impacted by address/zip code given at time of testing and could be undercounted as a result of the high amount of missing data.

ICU Hospitalizations

Oak Park residents utilize hospitals across our region. The state reports 16% ICU hospital bed availability at this time; anything under 20% of ICU hospital bed availability places a region in “warning” level.

Deaths

There were 0 reported deaths to residents from COVID-19 in the community for this time period.

Oak Park Residents Vaccinated

Oak Park is holding steady at 87.5% of residents receiving their first dose and 79.7% completing their primary vaccination series.

The Oak Park Department of Public Health is hosting two vaccination clinics this week for anyone age 5 and older who need their first, second, or booster dose:

- Thursday, Feb. 10, 3-7 pm at St. Giles Catholic Church, 1101 Columbian Ave.
- Saturday, Feb. 12, 10 am-2 pm at Oak Park River Forest High School, 201 Scoville Ave.

Age Range Data

Oak Park residents who tested positive for COVID-19 ranged in age from infancy to 99 years.

Age Range	Cases 2/2-2/8	% of Cases 2/2-2/8
0-4	13	8.4%
5-13	29	18.8%
14-19	10	6.5%
20-29	17	11.0%
30-39	21	13.6%
40-49	21	13.6%
50-59	20	13.0%
60-69	11	7.1%
70-79	7	4.5%
80-89	4	2.6%
90-99	1	.6%
Unknown	0	0%
Total	154
