COVID-19 Status Report  
Oak Park Village Board of Trustees

To: Village President and Village Board of Trustees

Fr: Kevin Jackson, Village Manager

The memo is a weekly status report presented Wednesdays and provides a brief summary of information regarding Village of Oak Park operational activities in response to COVID-19.

### **New COVID-19 Cases**

The Village of Oak Park Department of Public Health received official notification of 92 COVID-19 cases from March 31-April 6, 2022. This is a 61.4% increase over the last 7-day period, and a 124.4% increase over the cases 30 days ago.

### **COVID-19 Community Transmission Rates**

Based on the positives cases reported to the Village of Oak Park, for the week of March 31-April 6, our weekly COVID-19 rate of 169 cases per 100,000 places us in high community transmission. The CDC recommends tracking community transmission rates and using this to set control measures for hospitals and congregate living facilities. The state health department encourages tracking of community transmission rates for decision making around certain COVID-19 protocols in schools.

These numbers do not reflect those who tested positive using at home self-administered test. At-home test must be confirmed at an official testing site (pharmacy, physician office, health department, school, etc.) in order to be included in the official state count.

### **COVID-19 Community Levels**

On February 25, 2022, the CDC introduced COVID-19 Community Levels of low, medium, and high. Oak Park is in the low level, as defined by less than 200 cases per 100,000 (we have 169 per 100,000), and less than 10% of staffed inpatient beds occupied by COVID-19 patients (we have 3.5% of our hospital beds occupied by COVID-19 patients). We currently track our COVID admissions as cumulative totals, and the CDC definition requires new cases per 7 days. We will continue to adapt our data to align with CDC definitions so we can track and report on this metric.

## Deaths

There were 0 reported deaths to residents from COVID-19 in the community for this time period.

## Oak Park Residents Vaccinated

Oak Park reports 87.8% of residents receiving their first dose and 80.6% completing their primary vaccination series.

On March 30, 2022, the CDC approved an additional booster for certain populations:

- Everyone 50 and older
- People 12 and older who are moderately or severely immunocompromised
- People 18-49 who received a J&J vaccine and a J&J booster

Everyone must be at least four months post their initial booster to qualify.

The Oak Park Department of Public Health is hosting vaccination clinics for anyone age 5 and older who need their first, second, or booster dose. Check the Village of Oak Park website for up-to-date clinic information and to register.

- Thursday, April 7, 3-7 pm at Cheney Mansion, 220 N. Euclid Ave.
- Tuesday, April 12, 3-7 pm at Euclid Avenue United Methodist Church, 405 S. Euclid Ave.

## Age Range Data

Oak Park residents who tested positive for COVID-19 ranged in age from infancy to 90 years.

Age Range	Cases March 31- April 6	% of Cases March 31- April 6
0-4	6	6.5%
5-13	14	15.2%
14-19	5	5.4%
20-29	12	13.0%
30-39	11	12.0%
40-49	15	16.3%
50-59	13	14.1%
60-69	9	9.8%
70-79	6	6.5%
80-89	0	0%
90-99	1	1.1%
Unknown	0	0%
Total	92
